NOTES TO FINANCIAL STATEMENTS

NOTES TO FINANCIAL STATEMENTS

NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND GOING CONCERN

A. Accounting Practices

The financial statements of Aetna Insurance Company of Connecticut (the "Company") are presented on the basis of accounting practices prescribed or permitted by the State of Connecticut Insurance Department.

The State of Connecticut Insurance Department recognizes only statutory accounting practices prescribed or permitted by the State of Connecticut for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Connecticut Insurance Law ("Connecticut Accounting Practices"). The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures manual ("NAIC SAP") has been adopted as a component of Connecticut Insurance Law. The Company currently does not have any permitted practices.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Connecticut is shown below:

B. Use of Estimates in the Preparation of the Financial Statement

The preparation of financial statements in conformity with Connecticut Insurance Law requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

The Company began underwriting pet insurance business (reported as inland marine) in 2008 in conjunction with an exclusive relationship established with Pets Best Insurance Service, LLC, an Idaho limited liability company ("Pets Best"). In 2011, the Company notified Pets Best of its intention to terminate the exclusive relationship it had with Pets Best. On February 14, 2012, Pets Best announced that Independence American Insurance Company ("IAIC") would become the new underwriter of pet insurance plans offered by Pets Best. As a result, the last policy expired in the fourth quarter of 2014, and the pet insurance business has completely run-off as of December 31, 2015. In addition to the Company's pet insurance business, the Company entered into an occurrence professional liability policy for the policy periods March 1, 2014 through March 1, 2015 with Aetna Inc. ("Aetna") and its subsidiaries and affiliates. Such business was 100% ceded to Aetna Risk Indemnity Company, Ltd. ("ARIC"), an affiliate of the Company. By March 1, 2015, all policies were assumed by Aetna Risk Assurance Company of Connecticut Inc., an affiliate of the Company, and Aetna released the Company and ARIC of all of their duties and obligations under these policies. The Company did not enter into an additional occurrence professional liability policy after the end of the policy period March 1, 2015 through March 1, 2016 or March 1, 2014 through March 1, 2015.

Premiums earned are recorded as revenue over the period of risk in proportion to the amount of insurance protection provided. Nonadmitted amounts consist of all premiums due and unpaid greater than 90 days past due. In addition, for any customer in which the uncollected premiums which is greater than 90 days past due is more than a de minimus portion of less than 90 days past due premiums due and unpaid for that customer, the entire uncollected premiums balance for that customer is nonadmitted. Management also performs a specific review of accounts and based on the results of the review, consideration is given to nonadmitting additional amounts. After the calculation of the nonadmitted amounts, the Company evaluates the remaining admitted assets, and if it is probable that any additional amounts are uncollectible, those uncollectible amounts are written off and charged to other income in the period the determination is made. Uncollectible amounts are generally written off and charged to other income in the period in which the customer reconciliations are completed and agreed to by the customer (retroactivity) or when the account is determined to be uncollectible (bad debt).

Losses include, to the extent reasonably estimable, provisions for payments to be made on reported losses and losses incurred but not reported. Incurred but not reported losses include estimates of payments to be made on claims reported as of the balance sheet date and estimates of claims rendered but not reported to the Company as of the balance sheet date. Changes in estimates are recorded in losses incurred in current earnings in the period they are determined. Loss adjustment expenses represent costs incurred related to the claim settlement process such as costs to record, process and adjust claims. Loss adjustment expenses are calculated based on a percentage of premiums paid.

The Company is included in the consolidated federal income tax return of its parent company, Aetna, and Aetna's other wholly owned subsidiaries pursuant to the terms of a tax sharing agreement. In accordance with the Aetna and Subsidiaries Tax Sharing Agreement effective January 1, 2006 between Aetna and the Company, the Company's current Federal income tax provisions are generally computed as if the Company were filing a separate Federal income tax return. Current income tax benefits, including those resulting from net operating losses, are recognized to the extent realized in the consolidated return. Pursuant to this agreement, the Company has the enforceable right to recoup Federal income taxes paid in prior years in the event of future net losses, which it may incur, or to recoup its net losses carried forward as an offset to future net income subject to Federal income taxes.

Income taxes are accounted for under the asset and liability method. Deferred income tax assets ("DTAs") and liabilities ("DTLs") represent the expected future tax consequences of temporary differences generated by statutory accounting as defined in Statutory Statement of Accounting Principles ("SSAP") SSAP No. 101, Income Taxes ("SSAP No. 101"). DTAs and DTLs are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. DTAs and DTLs are computed by means of identifying temporary differences, which are measured using a balance sheet approach whereby statutory and tax basis balance sheets are compared. Current income tax recoverables include all current income taxes, including interest, reasonably expected to be recovered in a subsequent accounting period.

Pursuant to SSAP No. 101, gross DTAs are first reduced by a statutory valuation allowance adjustment to an amount that is more likely than not to be realized ("adjusted gross DTAs"). Adjusted gross DTAs are then admitted in an amount equal to the sum of paragraphs a. b. and c. below:

NOTES TO FINANCIAL STATEMENTS

- a. Federal income taxes paid in prior years that can be recovered through loss carrybacks for existing temporary differences that reverse during a timeframe corresponding with IRS tax loss carryback provisions.
- b. The amount of adjusted gross DTAs, after the application of paragraph a. above, expected to be realized within the applicable period and that is no greater than the applicable percentage as determined using the applicable Realization Threshold Limitation Table. The applicable period refers to the number of years in which the DTA will reverse in the Company's tax return and the applicable percentage refers to the percentage of the Company's statutory capital and surplus as required to be shown on the statutory balance sheet adjusted to exclude any net DTAs, electronic data processing ("EDP") equipment and operating system software and any net positive goodwill ("Stat Cap ExDTA").

The Realization Threshold Limitation Tables allow DTAs to be admitted based upon either realization within 3 years and 15 percent of Stat Cap ExDTA, 1 year and 10 percent of Stat Cap ExDTA, or no DTA admitted pursuant to this paragraph b. In general, the Realization Threshold Limitation Tables allow the Company to admit more DTAs if total DTAs as reported by the Company are a smaller percentage of statutory capital and surplus.

- c. The amount of gross DTAs, after the application of paragraphs a. and b. above that can be offset against existing gross DTLs. In applying this offset, the Company considers the character (i.e. ordinary versus capital) of the DTAs and DTLs such that offsetting would be permitted in the tax return under existing enacted federal income tax laws and regulations and the reversal patterns of temporary differences.

Changes in DTAs and DTLs are recognized as a separate component of gains and losses in surplus ("Change in net deferred income tax") except to the extent allocated to changes in unrealized gains and losses. Changes in DTAs and DTLs allocated to unrealized gains and losses are netted against the related changes in unrealized gains and losses and are reported as "Change in net unrealized capital gains (losses)", also a separate component of gains and losses in surplus.

In addition, the Company uses the following accounting policies:

1. Bonds designated Class 1 and 2 by the NAIC are carried at amortized cost. Bonds designated Class 3 through 6 by the NAIC are carried at the lower of fair value or amortized cost. Loan-backed and structured securities are carried at amortized cost adjusted for unamortized premiums and discounts. Premiums and discounts on loan-backed and structured securities are amortized using the interest method over the estimated remaining term of the securities, adjusted for anticipated prepayments. All adjustments between amortized cost and carrying value are reflected in unrealized capital gains and losses and are reported as direct adjustments to surplus. Bonds are recorded as purchases or sales on the trade date.

The Company periodically reviews its bonds to determine whether a decline in fair value below the carrying value is other-than-temporary. For bonds, other than loan-backed and structured securities, an other-than-temporary impairment ("OTTI") shall be recorded if it is probable that the Company will be unable to collect all amounts due according to the contractual terms in effect at the date of acquisition. Declines deemed to be OTTI in the cost basis are recognized as realized capital losses. Yield-related impairments are deemed other-than-temporary when the Company intends to sell an investment at the reporting date before recovery of the cost of the investment.

For loan-backed and structured securities, the Company records OTTI when the fair value of the loan-backed or structured security is less than the amortized cost basis at the balance sheet date and (1) the Company intends to sell the investment, or (2) the Company does not have the intent and ability to retain the investment for the time sufficient to recover the amortized cost basis, or (3) the Company does not expect to recover the entire amortized cost basis of the security, even if it does not intend to sell the security and has the intent and ability to hold. If it is determined an OTTI has occurred because of (1) or (2), the amount of the OTTI is equal to the difference between the amortized cost and the fair value of the security at the balance sheet date and this difference is recorded as a realized capital loss. If it is determined an OTTI has occurred because of (3), the amount of the OTTI is equal to the difference between the amortized cost and the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's effective interest rate and this difference is also accounted for as a realized capital loss.

The Company analyzes all relevant facts and circumstances for each investment when performing its analysis to determine whether an OTTI exists. Among the factors considered in evaluating whether a decline is other-than-temporary, management considers whether the decline in fair value results from a change in the quality of the investment security itself, whether the decline results from a downward movement in the market as a whole, the prospects for realizing the carrying value of the bond based on the investee's current and short-term prospects for recovery and other factors. The risks inherent in assessing the impairment of an investment include the risk that market factors may differ from our expectations and the risk that facts and circumstances factored into our assessment may change with the passage of time. Unexpected changes to market factors and circumstances that were not present in past reporting periods may result in a current period decision to sell securities that were not other-than-temporarily-impaired in prior reporting periods.

2. Fair values of bonds are determined based on quoted market prices when available, fair values using valuation methodologies based on available and observable market information or by using matrix pricing. If quoted market prices are not available, fair value is determined using broker quotes or an internal analysis of each investment's financial performance and cash flow projections.
3. Cash, cash equivalents and short-term investments, consisting primarily of money market instruments and other debt issues with an original maturity of up to one year, are carried at amortized cost. Short-term investments consist primarily of investments purchased with an original maturity date of greater than three months but less than one year. Cash equivalents consist of highly liquid instruments, which mature within three months from the date of purchase. The carrying amount of cash, cash equivalents and short-term investments approximates fair value.
4. Realized capital gains or losses are recorded on the specific identification method as the difference between current book/adjusted carrying value and sales proceeds of specific investments sold and are reported in net income. Realized capital losses also include write-downs on bonds considered to be other-than-temporarily impaired, including any other-than-temporary interest-related impairments.
5. Reinsurance premiums, commissions, expense reimbursements, and reserves related to reinsured business are accounted for on a basis consistent with terms of the reinsurance contracts. Premiums ceded to other companies have been reported as a reduction to premium income. Amounts applicable to reinsurance ceded for losses have been reported as reductions of those items. Reinsurance contracts do not relieve the Company from its obligations to policyholders as the primary insurer.

D. Going Concern

After evaluation at December 31, 2016, management has no concern over the Company's ability to continue as a going concern at this time. Management will continuously evaluate the Company's ability to continue as a going concern and will take appropriate action and will make appropriate disclosures if there is any change in any condition or events that would raise substantial doubt about the Company's ability to continue as a going concern.

NOTE 2 – ACCOUNTING CHANGES AND CORRECTIONS OF ERRORS

Effective December 31, 2015, SSAP No. 69 – Statement of Cash Flow was revised to clarify that only transactions involving cash shall be included in the cash flow statement. As a result, the Company has excluded certain non-cash transactions from its operating and investing activities at December 31, 2015 that were included at December 31, 2014. There were no changes to the Company's ending cash, cash equivalents and short-term investments as a result of this change.

NOTE 20 – FAIR VALUE MEASUREMENTS

- A. – B. The preparation of the Company's statutory financial statements in accordance with Connecticut Accounting Practices requires certain of our assets and liabilities to be reflected at their fair value, and others on another basis, such as an adjusted historical cost basis. In this note, the Company provides details on the fair value of financial assets and liabilities and how fair value is determined.

The following are the levels of the hierarchy and a brief description of the type of valuation information ("inputs") that qualifies a financial asset or liability for each level of fair value measurements.

- Level 1 – Unadjusted quoted prices for identical assets or liabilities in active markets.

NOTES TO FINANCIAL STATEMENTS

- **Level 2** – Inputs other than Level 1 that are based on observable market data. These include: quoted prices for similar assets in active markets, quoted prices for identical assets in inactive markets, inputs that are observable that are not prices (such as interest rates, credit risks, etc.) and inputs that are derived from or corroborated by observable markets.
- **Level 3** – Developed from unobservable data, reflecting our own assumptions.

When quoted prices in active markets for identical assets and liabilities are available, the Company uses these quoted market prices to determine the fair value of financial assets and liabilities and classify these assets and liabilities as Level 1. In other cases where a quoted market price for identical assets and liabilities in an active market is either not available or not observable, the Company estimates fair values using valuation methodologies based on available and observable market information or by using a matrix pricing model. These financial assets and liabilities would then be classified as Level 2. If quoted market prices are not available, the Company determines fair value using broker quotes or an internal analysis of each investment's financial performance and cash flow projections. In these instances, financial assets and liabilities will be classified based upon the lowest level of input that is significant to the valuation. Thus, financial assets and liabilities may be classified in Level 3 even though there may be some significant inputs that may be readily available.

- D. Business Interruption Insurance Recoveries – Not applicable.
- E. State Transferable and Non-Transferable Tax Credits

The Company does not currently hold any state transferable or non-transferable tax credits.

- F. Subprime Mortgage Related Risk Exposure

- (1) The Company defines its exposure to subprime mortgage related risk by looking at residential mortgage-backed securities ("RMBS"), including asset-backed securities ("ABS"). There are two broad classes of RMBS: a.) agency issued (GNMA, FNMA, and FHLC) that carry agency guarantees and explicit or implicit guarantees by the U.S. Government, and b.) Non-agency securities. ABS are subdivided by the underlying collateral (auto, credit card, home equity loans, utilities and other). The Company's exposure to subprime/ALT-A mortgages is through investments in ABS whose underlying collateral is home equity loans. The Company has mitigated its risk exposure by purchasing securities whose underlying collateral is fixed-rate mortgages which are not subject to interest payment resets, in which the projected average life of the securities is very short (two to three years). The Company's exposure to unrealized losses is due to changes in asset values. Interest and principal payments have been received timely and given the Company's low exposure risk to subprime/ALT-A mortgage securities relative to its fixed income portfolio, the Company has sufficient liquidity to meet future cash flow requirements without selling these assets at distressed prices.
- (2) The Company had no direct subprime mortgage related risk exposure at either December 31, 2016 or 2015.
- (3) Direct Exposure through Other Investments – Not applicable.
- (4) The Company had no underwriting exposure to subprime mortgage related risks through either Mortgage Guaranty or Financial Guaranty insurance coverages at either December 31, 2016 or 2015 as it did not write these types of coverages.

NOTES TO FINANCIAL STATEMENTS**NOTE 1 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND GOING CONCERN****A. Accounting Practices**

The financial statements of Aetna Insurance Company of Connecticut (the "Company") are presented on the basis of accounting practices prescribed or permitted by the State of Connecticut Insurance Department.

The State of Connecticut Insurance Department recognizes only statutory accounting practices prescribed or permitted by the State of Connecticut for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Connecticut Insurance Law ("Connecticut Accounting Practices"). The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures manual ("NAIC SAP") has been adopted as a component of Connecticut Insurance Law. The Company currently does not have any permitted practices.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Connecticut is shown below:

B. Use of Estimates in the Preparation of the Financial Statement

The preparation of financial statements in conformity with Connecticut Insurance Law requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

The Company began underwriting pet insurance business (reported as inland marine) in 2008 in conjunction with an exclusive relationship established with Pets Best Insurance Service, LLC, an Idaho limited liability company ("Pets Best"). In 2011, the Company notified Pets Best of its intention to terminate the exclusive relationship it had with Pets Best. On February 14, 2012, Pets Best announced that Independence American Insurance Company ("IAIC") would become the new underwriter of pet insurance plans offered by Pets Best. As a result, the last policy expired in the fourth quarter of 2014, and the pet insurance business has completely run-off as of December 31, 2015. In addition to the Company's pet insurance business, the Company entered into an occurrence professional liability policy for the policy periods March 1, 2014 through March 1, 2015 with Aetna Inc. ("Aetna") and its subsidiaries and affiliates. Such business was 100% ceded to Aetna Risk Indemnity Company, Ltd. ("ARIC"), an affiliate of the Company. By March 1, 2015, all policies were assumed by Aetna Risk Assurance Company of Connecticut Inc., an affiliate of the Company, and Aetna released the Company and ARIC of all of their duties and obligations under these policies. The Company did not enter into an additional occurrence professional liability policy after the end of the policy period March 1, 2014 through March 1, 2015.

Premiums earned are recorded as revenue over the period of risk in proportion to the amount of insurance protection provided. Nonadmitted amounts consist of all premiums due and unpaid greater than 90 days past due. In addition, for any customer in which the uncollected premiums which is greater than 90 days past due is more than a de minimus portion of less than 90 days past due premiums due and unpaid for that customer, the entire uncollected premiums balance for that customer is nonadmitted. Management also performs a specific review of accounts and based on the results of the review, consideration is given to nonadmitting additional amounts. After the calculation of the nonadmitted amounts, the Company evaluates the remaining admitted assets, and if it is probable that any additional amounts are uncollectible, those uncollectible amounts are written off and charged to other income in the period the determination is made. Uncollectible amounts are generally written off and charged to other income in the period in which the customer reconciliations are completed and agreed to by the customer (retroactively) or when the account is determined to be uncollectible (bad debt).

Losses include, to the extent reasonably estimable, provisions for payments to be made on reported losses and losses incurred but not reported. Incurred but not reported losses include estimates of payments to be made on claims reported as of the balance sheet date and estimates of claims rendered but not reported to the Company as of the balance sheet date. Changes in estimates are recorded in losses incurred in current earnings in the period they are determined. Loss adjustment expenses represent costs incurred related to the claim settlement process such as costs to record, process and adjust claims. Loss adjustment expenses are calculated based on a percentage of premiums paid.

The Company is included in the consolidated federal income tax return of its parent company, Aetna, and Aetna's other wholly owned subsidiaries pursuant to the terms of a tax sharing agreement. In accordance with the Aetna and Subsidiaries Tax Sharing Agreement effective January 1, 2006 between Aetna and the Company, the Company's current Federal income tax provisions are generally computed as if the Company were filing a separate Federal income tax return. Current income tax benefits, including those resulting from net operating losses, are recognized to the extent realized in the consolidated return. Pursuant to this agreement, the Company has the enforceable right to recoup Federal income taxes paid in prior years in the event of future net losses, which it may incur, or to recoup its net losses carried forward as an offset to future net income subject to Federal income taxes.

Income taxes are accounted for under the asset and liability method. Deferred income tax assets ("DTAs") and liabilities ("DTLs") represent the expected future tax consequences of temporary differences generated by statutory accounting as defined in Statutory Statement of Accounting Principles ("SSAP") SSAP No. 101, Income Taxes ("SSAP No. 101"). DTAs and DTLs are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. DTAs and DTLs are computed by means of identifying temporary differences, which are measured using a balance sheet approach whereby statutory and tax basis balance sheets are compared. Current income tax recoverables include all current income taxes, including interest, reasonably expected to be recovered in a subsequent accounting period.

Pursuant to SSAP No. 101, gross DTAs are first reduced by a statutory valuation allowance adjustment to an amount that is more likely than not to be realized ("adjusted gross DTAs"). Adjusted gross DTAs are then admitted in an amount equal to the sum of paragraphs a. b. and c. below:

- Federal income taxes paid in prior years that can be recovered through loss carrybacks for existing temporary differences that reverse during a timeframe corresponding with IRS tax loss carryback provisions.
- The amount of adjusted gross DTAs, after the application of paragraph a. above, expected to be realized within the applicable period and that is no greater than the applicable percentage as determined using the applicable Realization Threshold Limitation Table. The applicable

NOTES TO FINANCIAL STATEMENTS

period refers to the number of years in which the DTA will reverse in the Company's tax return and the applicable percentage refers to the percentage of the Company's statutory capital and surplus as required to be shown on the statutory balance sheet adjusted to exclude any net DTAs, electronic data processing ("EDP") equipment and operating system software and any net positive goodwill ("Stat Cap ExDTA").

The Realization Threshold Limitation Tables allow DTAs to be admitted based upon either realization within 3 years and 15 percent of Stat Cap ExDTA, 1 year and 10 percent of Stat Cap ExDTA, or no DTA admitted pursuant to this paragraph b. In general, the Realization Threshold Limitation Tables allow the Company to admit more DTAs if total DTAs as reported by the Company are a smaller percentage of statutory capital and surplus.

- c. The amount of gross DTAs, after the application of paragraphs a. and b. above that can be offset against existing gross DTLs. In applying this offset, the Company considers the character (i.e. ordinary versus capital) of the DTAs and DTLs such that offsetting would be permitted in the tax return under existing enacted federal income tax laws and regulations and the reversal patterns of temporary differences.

Changes in DTAs and DTLs are recognized as a separate component of gains and losses in surplus ("Change in net deferred income tax") except to the extent allocated to changes in unrealized gains and losses. Changes in DTAs and DTLs allocated to unrealized gains and losses are netted against the related changes in unrealized gains and losses and are reported as "Change in net unrealized capital gains (losses)", also a separate component of gains and losses in surplus.

In addition, the Company uses the following accounting policies:

1. Bonds designated Class 1 and 2 by the NAIC are carried at amortized cost. Bonds designated Class 3 through 6 by the NAIC are carried at the lower of fair value or amortized cost. Loan-backed and structured securities are carried at amortized cost adjusted for unamortized premiums and discounts. Premiums and discounts on loan-backed and structured securities are amortized using the interest method over the estimated remaining term of the securities, adjusted for anticipated prepayments. All adjustments between amortized cost and carrying value are reflected in unrealized capital gains and losses and are reported as direct adjustments to surplus. Bonds are recorded as purchases or sales on the trade date.

The Company periodically reviews its bonds to determine whether a decline in fair value below the carrying value is other-than-temporary. For bonds, other than loan-backed and structured securities, an other-than-temporary impairment ("OTTI") shall be recorded if it is probable that the Company will be unable to collect all amounts due according to the contractual terms in effect at the date of acquisition. Declines deemed to be OTTI in the cost basis are recognized as realized capital losses. Yield-related impairments are deemed other-than-temporary when the Company intends to sell an investment at the reporting date before recovery of the cost of the investment.

For loan-backed and structured securities, the Company records OTTI when the fair value of the loan-backed or structured security is less than the amortized cost basis at the balance sheet date and (1) the Company intends to sell the investment, or (2) the Company does not have the intent and ability to retain the investment for the time sufficient to recover the amortized cost basis, or (3) the Company does not expect to recover the entire amortized cost basis of the security, even if it does not intend to sell the security and has the intent and ability to hold. If it is determined an OTTI has occurred because of (1) or (2), the amount of the OTTI is equal to the difference between the amortized cost and the fair value of the security at the balance sheet date and this difference is recorded as a realized capital loss. If it is determined an OTTI has occurred because of (3), the amount of the OTTI is equal to the difference between the amortized cost and the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's effective interest rate and this difference is also accounted for as a realized capital loss.

The Company analyzes all relevant facts and circumstances for each investment when performing its analysis to determine whether an OTTI exists. Among the factors considered in evaluating whether a decline is other-than-temporary, management considers whether the decline in fair value results from a change in the quality of the investment security itself, whether the decline results from a downward movement in the market as a whole, the prospects for realizing the carrying value of the bond based on the investee's current and short-term prospects for recovery and other factors. The risks inherent in assessing the impairment of an investment include the risk that market factors may differ from our expectations and the risk that facts and circumstances factored into our assessment may change with the passage of time. Unexpected changes to market factors and circumstances that were not present in past reporting periods may result in a current period decision to sell securities that were not other-than-temporarily-impaired in prior reporting periods.

2. Fair values of bonds are determined based on quoted market prices when available, fair values using valuation methodologies based on available and observable market information or by using matrix pricing. If quoted market prices are not available, fair value is determined using broker quotes or an internal analysis of each investment's financial performance and cash flow projections.
3. Cash, cash equivalents and short-term investments, consisting primarily of money market instruments and other debt issues with an original maturity of up to one year, are carried at amortized cost. Short-term investments consist primarily of investments purchased with an original maturity date of greater than three months but less than one year. Cash equivalents consist of highly liquid instruments, which mature within three months from the date of purchase. The carrying amount of cash, cash equivalents and short-term investments approximates fair value.
4. Realized capital gains or losses are recorded on the specific identification method as the difference between current book/adjusted carrying value and sales proceeds of specific investments sold and are reported in net income. Realized capital losses also include write-downs on bonds considered to be other-than-temporarily impaired, including any other-than-temporary interest-related impairments.
5. Reinsurance premiums, commissions, expense reimbursements, and reserves related to reinsured business are accounted for on a basis consistent with terms of the reinsurance contracts. Premiums ceded to other companies have been reported as a reduction to premium income. Amounts applicable to reinsurance ceded for losses have been reported as reductions of those items. Reinsurance contracts do not relieve the Company from its obligations to policyholders as the primary insurer.

D. Going Concern

Effective December 31, 2016, the Company will adopt amended accounting guidance related to management's evaluation of whether there is a substantial doubt about the entity's ability to continue as a going concern and the related disclosures and will make disclosures at that time and thereafter pursuant to the guidance.

NOTE 2 – ACCOUNTING CHANGES AND CORRECTIONS OF ERRORS

Effective December 31, 2015, SSAP No. 69 – Statement of Cash Flow was revised to clarify that only transactions involving cash shall be included in the cash flow statement. As a result, the Company has excluded certain non-cash transactions from its operating and investing activities at December 31, 2015 that were included at December 31, 2014. There were no changes to the Company's ending cash, cash equivalents and short-term investments as a result of this change.

NOTE 20 – FAIR VALUE MEASUREMENTS

A. – B. The preparation of the Company's statutory financial statements in accordance with Connecticut Accounting Practices requires certain of our assets and liabilities to be reflected at their fair value, and others on another basis, such as an adjusted historical cost basis. In this note, the Company provides details on the fair value of financial assets and liabilities and how fair value is determined.

The following are the levels of the hierarchy and a brief description of the type of valuation information ("inputs") that qualifies a financial asset or liability for each level of fair value measurements.

- **Level 1** – Unadjusted quoted prices for identical assets or liabilities in active markets.
- **Level 2** – Inputs other than Level 1 that are based on observable market data. These include: quoted prices for similar assets in active markets, quoted prices for identical assets in inactive markets, inputs that are observable that are not prices (such as interest rates, credit risks, etc.) and inputs that are derived from or corroborated by observable markets.
- **Level 3** – Developed from unobservable data, reflecting our own assumptions.

When quoted prices in active markets for identical assets and liabilities are available, the Company uses these quoted market prices to determine the fair value of financial assets and liabilities and classify these assets and liabilities as Level 1. In other cases where a quoted market price for identical assets and liabilities in an active market is either not available or not observable, the Company estimates fair values using valuation methodologies based on available and observable market information or by using a matrix pricing model. These financial assets and liabilities would then be classified as Level 2. If quoted market prices are not available, the Company determines fair value using broker quotes or an internal analysis of each investment's financial performance and cash flow projections. In these instances, financial assets and liabilities will be classified based upon the lowest level of input that is significant to the valuation. Thus, financial assets and liabilities may be classified in Level 3 even though there may be some significant inputs that may be readily available.

E. State Transferable and Non-Transferable Tax Credits

The Company does not currently hold any state transferable or non-transferrable tax credits.

F. Subprime Mortgage Related Risk Exposure

(1) The Company defines its exposure to subprime mortgage related risk by looking at residential mortgage-backed securities ("RMBS"), including asset-backed securities ("ABS"). There are two broad classes of RMBS: a.) agency issued (GNMA, FNMA, and FHLC) that carry agency guarantees and explicit or implicit guarantees by the U.S. Government, and b.) non-agency securities. ABS are subdivided by the underlying collateral (auto, credit card, home equity loans, utilities and other). The Company's exposure to subprime/ALT-A mortgages is through investments in ABS whose underlying collateral is home equity loans. The Company has mitigated its risk exposure by purchasing securities whose underlying collateral is fixed-rate mortgages which are not subject to interest payment resets, in which the projected average life of the securities is very short (two to three years). The Company's exposure to unrealized losses is due to changes in asset values. Interest and principal payments have been received timely and given the Company's low exposure risk to subprime/ALT-A mortgage securities relative to its fixed income portfolio, the Company has sufficient liquidity to meet future cash flow requirements without selling these assets at distressed prices.

(2) The Company had no direct subprime mortgage related risk exposure at either December 31, 2015 or 2014.

(3) Direct Exposure Through Other Investments – Not applicable.

NOTES TO FINANCIAL STATEMENTS

(4) The Company had no underwriting exposure to subprime mortgage related risks through either Mortgage Guaranty or Financial Guaranty insurance coverages at either December 31, 2015 or 2014 as it did not write these types of coverages.

NOTE 25 – CHANGE IN INCURRED LOSSES AND LOSS ADJUSTMENT EXPENSES

Net reserves as of December 31, 2014 were \$326,382. From December 31, 2014 to December 31, 2015, \$2,073 has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$275,248 as a result of re-estimation of unpaid losses and loss adjustment expenses, all on the Company's run-off business of group auto insurance. Therefore, there has been a \$49,061 favorable prior-year development from December 31, 2014 to December 31, 2015. The decrease is generally the result of ongoing analysis of recent loss development trends, as well as the release of all remaining pet insurance reserves. NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

The financial statements of Aetna Insurance Company of Connecticut (the "Company") are presented on the basis of accounting practices prescribed or permitted by the State of Connecticut Insurance Department.

The State of Connecticut Insurance Department recognizes only statutory accounting practices prescribed or permitted by the State of Connecticut for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Connecticut Insurance Law ("Connecticut Accounting Practices"). The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures manual ("NAIC SAP") has been adopted as a component of Connecticut Insurance Law. The Company currently does not have any permitted practices.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of Connecticut is shown below:

	State of Domicile	2014	2013
1. Net Income Connecticut state basis		\$ 224,903	\$75,611
2. State Prescribed Practices (Income)	CT	-	-
3. State Permitted Practices (Income)	CT	-	-
4. Net Income, NAIC SAP		<u>\$ 224,903</u>	<u>\$75,611</u>
5. Statutory Surplus Connecticut basis		\$15,127,323	\$14,960,158
6. State Prescribed Practices (Surplus)	CT	-	-
7. State Permitted Practices (Surplus)	CT	-	-
8. Statutory Surplus, NAIC SAP		<u>\$15,127,323</u>	<u>\$14,960,158</u>

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Connecticut Insurance Law requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

The Company began underwriting pet insurance business (reported as inland marine) in 2008 in conjunction with an exclusive relationship established with Pets Best Insurance Service, LLC, an Idaho limited liability company ("Pets Best"). In 2011, the Company notified Pets Best of its intention to terminate the exclusive relationship it had with Pets Best. On February 14, 2012, Pets Best announced that Independence American Insurance Company ("IAIC") would become the new underwriter of pet insurance plans offered by Pets Best. As a result, the Company's pet insurance business has been in run-off and the last policy expired in the fourth quarter of 2014. IAIC has received approval in all states and is underwriting all new policies. In addition to the Company's pet insurance business, the Company entered into an occurrence professional liability policy for the policy periods March 1, 2014 through March 1, 2015 and February 1, 2013 through March 1, 2014, respectively, with Aetna Inc. ("Aetna") and its subsidiaries and affiliates. Such business is 100% ceded to Aetna Risk Indemnity Company, Ltd., an affiliate of the Company.

Premiums earned are recorded as revenue over the period of risk in proportion to the amount of insurance protection provided. Nonadmitted amounts consist of all premiums due and unpaid greater than 90 days past due. In addition, for any customer in which the uncollected premiums which is greater than 90 days past due is more than a de minimus portion of less than 90 days past due premiums due and unpaid for that customer, the entire uncollected premiums balance for that customer is nonadmitted. Management also performs a specific review of accounts and based on the results of the review, consideration is given to nonadmitting additional amounts. After the calculation of the nonadmitted amounts, the Company evaluates the remaining admitted assets, and if it is probable that any additional amounts are uncollectible, those uncollectible amounts are written off and charged to other income in the period the determination is made. Uncollectible amounts are generally written off and charged to other income in the period in which the customer reconciliations are completed and agreed to by the customer (retroactively) or when the account is determined to be uncollectible (bad debt).

Unearned premiums are calculated based upon the amount of the annual policy that is not yet earned at the end of the reporting period. Related losses and expenses, including acquisition costs such as premium taxes and other items, are charged to current operations as incurred.

Losses and loss adjustment expense reserves include, to the extent reasonably estimable, provisions for payments to be made on reported losses and losses incurred but not reported and for associated loss adjustment expenses. Incurred but not reported losses include estimates of payments to be made on claims reported as of the balance sheet date and estimates of claims rendered but not reported to the Company as of the balance sheet date. Such estimates are developed using actuarial principles and assumptions which consider, among other things, contracted requirements, historical utilization trends and payment patterns, product mix, seasonality and other relevant factors. Changes in estimates are recorded in losses incurred in current earnings in the period they are determined. Loss adjustment expenses represent costs incurred related to the claim settlement process such as costs to record, process and adjust claims. Loss adjustment expenses are calculated based on a percentage of premiums paid.

The Company evaluates its contracts to determine if it is probable that a loss will be incurred. A premium deficiency reserve is established when the unearned premium reserves and any future installment premiums are not sufficient to cover anticipated loss payments and expenses on existing policies. Anticipated investment income is not considered in the calculation of premium deficiency losses. For purpose of determining if a premium deficiency exists, insurance contracts shall be grouped in a manner consistent with how policies are marketed, serviced and measured.

The Company is included in the consolidated federal income tax return of its parent company, Aetna, Inc. ("Aetna"), and Aetna's other wholly owned subsidiaries pursuant to the terms of a tax sharing agreement. In accordance with the Aetna and Subsidiaries Tax Sharing Agreement and also with a Supplemental Tax Sharing Agreement, both effective January 1, 2006 between Aetna and the Company, the Company's current Federal income tax provisions are generally computed as if the Company were filing a separate Federal income tax return. Current income tax benefits, including those resulting from net operating losses, are recognized to the extent realized in the consolidated return. Pursuant to this agreement, the Company has the enforceable right to recoup Federal income taxes paid in prior years in the event of future net losses, which it may incur, or to recoup its net losses carried forward as an offset to future net income subject to Federal income taxes.

NOTES TO FINANCIAL STATEMENTS

Income taxes are accounted for under the asset and liability method. Deferred income tax assets ("DTAs") and liabilities ("DTLs") represent the expected future tax consequences of temporary differences generated by statutory accounting as defined in Statement of Statutory Accounting Principles ("SSAP") No. 101, Income Taxes, A Replacement of SSAP No. 10R and SSAP No. 10 ("SSAP No. 101"). DTAs and DTLs are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. DTAs and DTLs are computed by means of identifying temporary differences, which are measured using a balance sheet approach whereby statutory and tax basis balance sheets are compared. Current income tax recoverables include all current income taxes, including interest, reasonably expected to be recovered in a subsequent accounting period.

Pursuant to SSAP No. 101, gross DTAs are first reduced by a statutory valuation allowance adjustment to an amount that is more likely than not to be realized ("adjusted gross DTAs"). Adjusted gross DTAs are then admitted in an amount equal to the sum of paragraphs a, b, and c, below:

- a. Federal income taxes paid in prior years that can be recovered through loss carrybacks for existing temporary differences that reverse during a timeframe corresponding with IRS tax loss carryback provisions.
- b. The amount of adjusted gross DTAs, after the application of paragraph a. above, expected to be realized within the applicable period and that is no greater than the applicable percentage as determined using the applicable Realization Threshold Limitation Table. The applicable period refers to the number of years in which the DTA will reverse in the Company's tax return and the applicable percentage refers to the percentage of the Company's statutory capital and surplus as required to be shown on the statutory balance sheet adjusted to exclude any net DTAs, electronic data processing ("EDP") equipment and operating system software and any net positive goodwill ("Stat Cap ExDTA").

The Realization Threshold Limitation Tables allow DTAs to be admitted based upon either realization within 3 years and 15 percent of Stat Cap ExDTA, 1 year and 10 percent of Stat Cap ExDTA, or no DTA admitted pursuant to this paragraph b. In general, the Realization Threshold Limitation Tables allow the Company to admit more DTAs if total DTAs as reported by the Company are a smaller percentage of statutory capital and surplus.

- c. The amount of gross DTAs, after the application of paragraphs a. and b. above that can be offset against existing gross DTLs. In applying this offset, the Company considers the character (i.e. ordinary versus capital) of the DTAs and DTLs such that offsetting would be permitted in the tax return under existing enacted federal income tax laws and regulations and the reversal patterns of temporary differences.

Changes in DTAs and DTLs are recognized as a separate component of gains and losses in surplus ("Change in net deferred income tax") except to the extent allocated to changes in unrealized gains and losses. Changes in DTAs and DTLs allocated to unrealized gains and losses are netted against the related changes in unrealized gains and losses and are reported as "Change in net unrealized capital gains (losses)", also a separate component of gains and losses in surplus.

In addition, the Company uses the following accounting policies:

1. Bonds designated Class 1 and 2 by the NAIC are carried at amortized cost. Bonds designated Class 3 through 6 by the NAIC are carried at the lower of fair value or amortized cost. Loan-backed and structured securities are carried at amortized cost adjusted for unamortized premiums and discounts. Premiums and discounts on loan-backed and structured securities are amortized using the interest method over the estimated remaining term of the securities, adjusted for anticipated prepayments. All adjustments between amortized cost and carrying value are reflected in unrealized capital gains and losses and are reported as direct adjustments to surplus. Bonds are recorded as purchases or sales on the trade date.

The Company periodically reviews its bonds to determine whether a decline in fair value below the carrying value is other-than-temporary. For bonds, other than loan-backed and structured securities, an other-than-temporary impairment ("OTTI") shall be recorded if it is probable that the Company will be unable to collect all amounts due according to the contractual terms in effect at the date of acquisition. Declines deemed to be OTTI in the cost basis are recognized as realized capital losses. Yield-related impairments are deemed other-than-temporary when the Company intends to sell an investment at the reporting date before recovery of the cost of the investment.

For loan-backed and structured securities, the Company records OTTI when the fair value of the loan-backed or structured security is less than the amortized cost basis at the balance sheet date and (1) the Company intends to sell the investment, or (2) the Company does not have the intent and ability to retain the investment for the time sufficient to recover the amortized cost basis, or (3) the Company does not expect to recover the entire amortized cost basis of the security, even if it does not intend to sell the security and has the intent and ability to hold. If it is determined an OTTI has occurred because of (1) or (2), the amount of the OTTI is equal to the difference between the amortized cost and the fair value of the security at the balance sheet date and this difference is recorded as a realized capital loss. If it is determined an OTTI has occurred because of (3), the amount of the OTTI is equal to the difference between the amortized cost and the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's effective interest rate and this difference is also accounted for as a realized capital loss.

The Company analyzes all relevant facts and circumstances for each investment when performing its analysis to determine whether an OTTI exists. Among the factors considered in evaluating whether a decline is other-than-temporary, management considers whether the decline in fair value results from a change in the quality of the investment security itself, whether the decline results from a downward movement in the market as a whole, the prospects for realizing the carrying value of the bond based on the investee's current and short-term prospects for recovery and other factors. The risks inherent in assessing the impairment of an investment include the risk that market factors may differ from our expectations and the risk that facts and circumstances factored into our assessment may change with the passage of time. Unexpected changes to market factors and circumstances that were not present in past reporting periods may result in a current period decision to sell securities that were not other-than-temporarily-impaired in prior reporting periods.

2. Fair values of bonds are determined based on quoted market prices when available, fair values using valuation methodologies based on available and observable market information or by using matrix pricing. If quoted market prices are not available, fair value is determined using broker quotes or an internal analysis of each investment's financial performance and cash flow projections.
3. Cash, cash equivalents and short-term investments, consisting primarily of money market instruments and other debt issues with an original maturity of up to one year, are carried at amortized cost. Short-term investments consist primarily of investments purchased with an original maturity date of greater than three months but less than one year. Cash equivalents consist of highly liquid instruments, which mature within three months from the date of purchase. The carrying amount of cash, cash equivalents and short-term investments approximates fair value.
4. Realized capital gains or losses are recorded on the specific identification method as the difference between current

NOTES TO FINANCIAL STATEMENTS

book/adjusted carrying value and sales proceeds of specific investments sold and are reported in net income. Realized capital losses also include write-downs on bonds considered to be other-than-temporarily impaired, including any other-than-temporary interest-related impairments.

5. Reinsurance premiums, commissions, expense reimbursements, and reserves related to reinsured business are accounted for on a basis consistent with terms of the reinsurance contracts. Premiums ceded to other companies have been reported as a reduction to premium income. Amounts applicable to reinsurance ceded for losses and loss adjustment expense reserves have been reported as reductions of those items. Reinsurance contracts do not relieve the Company from its obligations to policyholders as the primary insurer.

20. Fair Value Measurements

A.-B. The preparation of the Company's statutory financial statements in accordance with Connecticut Accounting Practices requires certain of our assets and liabilities to be reflected at their fair value, and others on another basis, such as an adjusted historical cost basis. In this note, the Company provides details on the fair value of financial assets and liabilities and how fair value is determined.

The following are the levels of the hierarchy and a brief description of the type of valuation information ("inputs") that qualifies a financial asset or liability for each level of fair value measurements.

- **Level 1** – Unadjusted quoted prices for identical assets or liabilities in active markets.
- **Level 2** – Inputs other than Level 1 that are based on observable market data. These include: quoted prices for similar assets in active markets, quoted prices for identical assets in inactive markets, inputs that are observable that are not prices (such as interest rates, credit risks, etc.) and inputs that are derived from or corroborated by observable markets.
- **Level 3** – Developed from unobservable data, reflecting our own assumptions.

When quoted prices in active markets for identical assets and liabilities are available, the Company uses these quoted market prices to determine the fair value of financial assets and liabilities and classify these assets and liabilities as Level 1. In other cases where a quoted market price for identical assets and liabilities in an active market is either not available or not observable, we estimate fair values using valuation methodologies based on available and observable market information or by using a matrix pricing model. These financial assets and liabilities would then be classified as Level 2. If quoted market prices are not available, the Company determines fair value using broker quotes or an internal analysis of each investment's financial performance and cash flow projections. In these instances, financial assets and liabilities will be classified based upon the lowest level of input that is significant to the valuation. Thus, financial assets and liabilities may be classified in Level 3 even though there may be some significant inputs that may be readily available.

E. State Transferable and Non-transferable Tax Credits

The Company does not currently hold any state transferable or non-transferable tax credits.

F. Subprime Mortgage Related Risk Exposure

1. The Company defines its exposure to subprime mortgage related risk by looking at residential mortgage-backed securities ("RMBS"), including asset-backed securities ("ABS"). There are two broad classes of RMBS: a.) agency issued (GNMA, FNMA, and FHLC) that carry agency guarantees and explicit or implicit guarantees by the U.S. Government, and b.) non-agency securities. ABS are subdivided by the underlying collateral (auto, credit card, home equity loans, utilities and other). The Company's exposure to subprime/ALT-A mortgages is through investments in ABS whose underlying collateral is home equity loans. The Company has mitigated its risk exposure by purchasing securities whose underlying collateral is fixed-rate mortgages which are not subject to interest payment resets, in which the projected average life of the securities is very short (two to three years). The Company's exposure to unrealized losses is due to changes in asset values. Interest and principal payments have been received timely and given the Company's low exposure risk to subprime/ALT-A mortgage securities relative to its fixed income portfolio, the Company has sufficient liquidity to meet future cash flow requirements without selling these assets at distressed prices.

2. The Company had no direct subprime mortgage related risk exposure at either December 31, 2014 or 2013.

3. Direct Exposure through other investments – Not applicable.

4. The Company had no underwriting exposure to subprime mortgage related risks through either Mortgage Guaranty or Financial Guaranty insurance coverages at either December 31, 2014 or 2013 as it did not write these types of coverages.

From December 31, 2013 to December 31, 2014, \$194,865 has been paid for incurred losses and loss adjustment expenses attributable to insured events of prior years. Reserves remaining for prior years are now \$321,146 as a result of re-estimation of unpaid claims and claim adjustment expenses, all on the Company's run-off businesses of pet insurance and group auto insurance. Therefore, there has been a \$65,266 favorable prior-year development from December 31, 2013 to December 31, 2014.
