## NOTES TO FINANCIAL STATEMENTS

## 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND GOING CONCERN

## A. Accounting Practices

The statutory financial statements of R.V.I. America Insurance Company (the "Company") are presented in conformity with accounting practices prescribed or permitted by the State of Connecticut Insurance Department.

The State of Connecticut Insurance Department recognizes only statutory accounting practices prescribed or permitted by the State of Connecticut for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the Connecticut Insurance Law. ## B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statements of Statutory Accounting Principles ("SSAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses for the reporting period. Actual results could differ from those estimates.

## C. Accounting Policy

Net premiums written are recorded on an accrual basis in accordance with the insurance policies and reinsurance agreements written. All residual value insurance contracts written are considered to be long duration contracts, which are single or fixed premium policies that are non-cancellable. Premiums are earned ratably over the terms of the insured assets, which range from 1 to 27 years. Ceded premiums are expensed ratably over the terms of the reinsurance agreements. Net unearned premiums represent the portion of premiums written less premiums ceded which remain to be accreted straight-line over the unexpired terms of insurance and reinsurance agreements, respectively. The unearned premium reserve is reviewed in conjunction with unpaid losses and loss adjustment expense in assessing overall reserve adequacy.

Commissions, employee compensation and other acquisition costs related to premiums written are expensed when incurred. Ceding allowances and ceding commissions are recognized as income when the premium is ceded.

Realized gains or losses are determined using specific identification. Investment income is recorded as earned using the constant yield method.

In addition, the Company uses the following accounting policies:

- (1) Short-term investments having a maturity date of one year or less at the time of purchase are stated at amortized cost using the constant yield method.
- (2) Bonds not backed by other loans are stated at amortized cost using the constant yield method.
- (3) Not applicable.
- (4) Preferred stocks are stated in accordance with the guidance provided in SSAP No. 32.
- (5) Not applicable.
- (6) Loan-backed bonds and structured securities are stated at amortized cost, using the constant yield method including anticipated prepayments at the date of purchase. The retrospective adjustment method is used for significant changes in estimated cash flows from the original purchase assumptions.
- (7) Not applicable.
- (8) The Company has ownership interests in limited liability companies. The Company carries these interests at the lower of book or fair market value.
- (9) Not applicable.
- (10) The Company does not have a premium deficiency in accordance with SSAP No. 53, "Property-Casualty Contracts - Premiums".

NOTES TO FINANCIAL STATEMENTS

- (11) Unpaid losses and loss adjustment expenses, net of related reinsurance recoverables, are charged to earnings when incurred. Management periodically reviews projections of an insured asset's value using quantitative methods or the appraised value of insured assets in consideration with pertinent policy terms. Based on the terms and conditions of the policy, management's best estimate of the ultimate unpaid loss (i.e., case reserves and incurred but not reported reserves ("IBNR")) is recorded, which is generally the excess of the insured value over those projections or appraised values net of deductibles, if any. Unpaid losses and loss adjustment expenses (i.e. case reserves and IBNR), net of reinsurance recoverables, are reviewed by management throughout the year and changes in estimates are reflected in income. IBNR, net of related reinsurance recoverables, are established based on management's best estimate of incurred losses. Changes in net IBNR estimates are reflected in income.

In 2017, the Company reclassified approximately \$0.7 million of loss adjustment expense reserves to net loss reserves to provide for case loss reserves incurred in 2017. This reclassification had no impact on net income.

- (12) The Company has not modified its capitalization policy from the prior period.

Model assumptions are specific to asset class and collateral types and are regularly evaluated and adjusted where appropriate.

## 25. CHANGE IN INCURRED LOSSES AND LOSS ADJUSTMENT EXPENSES

Management continually reviews the insured portfolio to determine whether asset values have declined below the residual value guaranteed in the insurance contracts. Projections of an asset's value at the end of the contract are made using either quantitative methods or by obtaining asset valuations from professionally qualified third parties. Asset types are selected for review based on their risk profile; therefore, not all insured assets are reviewed annually. Actual asset values at the end of the contract may deviate from these projections due to shifts in the economy, market conditions and demand for that asset type. In addition, the asset value may also be affected by factors unique to a particular asset such as strategic changes made by the manufacturer. Management considers market conditions and other factors when reviewing the portfolio and establishing reserves. However, volatility in projected market values does exist; therefore, estimates and assumptions made by management can differ from actual results.

The Company's total gross paid claims and external loss adjustment expenses related to its residual value contracts in 2018 was \$3,021,034. The Company also paid gross claims of \$93,831 and \$96,162 as of December 31, 2018 and December 31, 2017, respectively, relating to accident and health business that is 100% ceded and all recoverable amounts were received as of December 31, 2018 and December 31, 2017, respectively.

The Company has an internal database and an econometrics loss model which utilizes the insured asset data that was originally furnished by our clients at inception of the insurance coverage for each asset in the insured portfolio, in consideration of the establishment of IBNR for the passenger vehicle portfolio. The econometrics model projects the asset value at the end of its respective lease term and calculates the gain or loss under the contract for each insured vehicle using both current and projected future variables. It is a complex process. The key assumptions and/or variables employed are projections of unemployment rates, GDP growth rate, gas spending, projections of future monthly depreciation rates, a calculation of a return rate and assignment of a probability of return based on the magnitude of the gain or loss for each vehicle. In addition, qualitative factors are implicitly considered in determining the best estimate of ultimate losses, such as trends in new and used car inventory, new car dealer incentives, and current client specific data. With the volatility in the economy there is a high degree of uncertainty in projecting future passenger vehicle values.

## NOTES TO FINANCIAL STATEMENTS

The loss model is a tool that is used to determine the estimated loss (if any) for each passenger vehicle insurance contract. The Company records its loss provision in accordance with NAIC Guidance of SSAP No. 5R. The Company made no changes to the loss provision method of calculation in 2018 and 2017, respectively. The Company believes its' estimate of IBNR reserves is reasonable, but there is no assurance that adverse development will not occur and that, if it occurs, it will not exceed unpaid losses as of December 31, 2018.

Overall reserve adequacy for long duration contracts considers unpaid losses and loss adjustment expense and the unearned premium reserve. The unearned premium reserve is evaluated to determine whether it is adequate when considering expected losses and expense ratios in the aggregate. Based on expected losses and expense ratios, no additional adjustments were required to the unearned premium reserve as of December 31, 2018. However, there is no assurance that adverse development will not occur in the future and that, if it occurs, it could impact the unearned premium reserve.

As of and for the years ending December 31, 2018 and 2017, unpaid losses and loss adjustment expenses relate to the establishment of IBNR and case reserves. Development of the liability for unpaid losses and loss adjustment expense is summarized below:

	<u>2018</u>	<u>2017</u>

- 6.2 Management continually reviews the insured portfolio to determine whether asset values have declined below the residual value guaranteed in the insurance contracts. Projections on an asset's value at the end of the contract are either derived using quantitative methods or by obtaining asset valuations from professionally qualified third parties. Asset types are selected for review based on their risk profile, therefore, not all insured assets are reviewed annually. Actual asset values at the end of the contract may deviate from these projections due to shifts in the economy, market conditions and demand for that asset type. In addition, the asset value may also be affected by factors unique to a particular asset such as strategic changes made by a manufacturer. Management considers market conditions and other factors when reviewing the portfolio and establishing reserves.
- 6.3 This business is ceded at 81.25% to the indirect parent company, R.V.I. Guaranty Co., Ltd. The reinsurance agreement also provides for the ceding of additional amounts if any single risk exceeds the lesser of \$1.25 million or 10% of statutory surplus per risk per policy. The Company also as a "cut-through" arrangement with its indirect parent to cover catastrophic protection. The Company also has reinsurance agreements with third parties where the risk profile on the underlying insurance contracts exceeds the Company's underwriting guidelines.
